

ORBIT: From Harness Intelligence

Real work. Real tools. Right now.

Inside Orbit you'll find:

- Prompt packs for productivity, insight, and design
- Peer coaching & facilitator tips
- Shared Prompt Vault (post-session resource)
- Real deliverables created in-session
- Scale-up guidance to embed in team workflows

Hands-on Copilot activation sprints to deepen skills, build assets, and drive impact.

Ignite sparked your journey. Comet built your habits. Now it's time to go further. Orbit gives professionals the space to apply Copilot directly to their real work—producing **usable assets, insights, and designs** that create **immediate business impact**.

Orbit transforms AI skills into business impact. Each session is a working sprint—focused, practical, and output-driven—so you leave not just with ideas, but with results that matter.

What you'll gain:

- **Deeper capability** — master Copilot in the tools you already use.
- **Real outputs** — walk away with usable emails, decks, memos, and insights.
- **Efficiency at scale** — accelerate repetitive tasks and decision cycles.
- **Augmentation + automation** — learn to design your own Copilot agents.
- **Lasting impact** — standardize new routines and workflows that stick.

“Orbit gave me the space to actually do the work with Copilot. I left with polished deliverables I could use that same day—and new skills I now use every week.”

Harness Intelligence is an Advantage Performance Group thought leader partner.

How it works (3 sprints):

1. **Copilot for productivity**
Outlook, Word, Excel, Teams. Tackle actual emails, reports, briefs, and recaps—leave with work done.
2. **Copilot for insight & analysis**
Excel, Teams, Word. Extract trends, summarize data, and generate decision-ready insights.
3. **Copilot for design & visual communication**
PowerPoint, Designer, Word. Transform cluttered slides and docs into clear, compelling visuals.

Each session = 90 minutes:

- Concept kickoff + demo (10-15 min)
- Real work application block (40-45 min)
- Team share & refine (20 min)
- Facilitator debrief + scale-up plan (15 min)

Take your work into Orbit

Sessions are virtual, 90 minutes each, and business-impact oriented. Bring your own work, learn new skills, and walk away with results you can use immediately.

“Orbit is where experimentation turns into expertise. When professionals apply Copilot in the flow of their real work, they don't just save time—they change how value gets created.”
