

**Target audience:**

*Acceleration Lab* is an energizing one-day program built for leaders at all levels who are ready to seize the future. This isn't about playing catch-up with change—it's about charging ahead, getting in front of it, and shaping what's next. Collaborative, hands-on, and packed with real work, *Acceleration Lab* delivers bold insights and actionable strategies for leaders into the future and beyond.

**Optional add-ons or customization:**

After experiencing *Acceleration Lab*, take an 11-step individual journey with **Comet**—our custom-built **1st90** platform that keeps the fire burning. Share insights and impact through its social features, amplifying your edge. For senior leaders, ask about our **Executive Strategy Room**—a C-level experience powered by USC Marshall School of Business, tapping their cutting-edge researchers and faculty to redefine what's possible.

We also have the **LaunchPad**, our half-day AI accelerator; and access to our unique **HiBots** that offer a safe place for participants to experiment and experience working with AI as a thought partner and co-creator in the flow of their Hi learning experience: The Sandbox, the PracticeBot, the CoachBot, IntelliPRINT, TeamPRINT, and the Customer Time Machine.

# Acceleration Lab

*Change is accelerating.  
Find your superpowers and imagine the future.*

## Intelligence, activated.

*Acceleration Lab* isn't just a workshop—it's a working laboratory from our thought leader partners at **Harness Intelligence**. Leaders explore and ignite their *Intelligence Ecosystem™* to fuel breakthrough thinking. In diverse teams, they map their current state with a value chain—from customers to their own function—then engage Brynjolfsson's notion of AI-driven automation and augmentation to eliminate waste, improve efficiency, and unlock unrealized potential. No more reacting—*Acceleration Lab* puts leaders in the driver's seat.

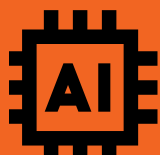

Next, participants tackle 10 game-changing trends that will impact their teams and industries. Armed with foresight, they craft a future-ready value chain 2 years out. With generative AI as their thought partner, they uncover new realities and find their personal superpower. The finale? Teams build "*artifacts from the future*," bringing their vision to life and locking in a mindset that thrives on what's ahead.

**Experiential learning approach:** *Acceleration Lab* is pure energy—with leaders at learning maps, side by side, doing real discovery work. This isn't theory; it's action. Collaboration soars, generative AI mastery accelerates, and confidence grows as you work, learn, and co-create.

**Program content:** Start with a pre-class assessment that lights the fuse. In session, explore your 7 intelligence domains, map dual value chains (now and next), and explore opportunities for AI-enabled automation and new value creation. With 10 future trends to sharpen your edge, AI reveals your superpower, and you cap it with future artifacts that can fuel real innovation. Generative AI isn't just a tool here—it's your accelerator to stay ahead.

*Talk to your Advantage partner or contact us for details on how to access!*

**Learning outcomes:** You'll leave *Acceleration Lab* with a better understanding on how to fully leverage your 7 intelligence domains with a bold future vision and the moves to make it real. Generative AI now will fill a virtual seat at your worktable, collaboration hits overdrive, and your superpower ignites—propelling you to lead, not follow. **This is about mindset, momentum, and mastery.**
