

Acceleration Lab

A full-day AI innovation lab for people who'll do the work

Inside Acceleration Lab you'll find:

- 6.5 hours, 20-25 working participants (max 30)
- 60%+ hands-on with your AI platform
- The Intelligence Ecosystem™ framework
- Customer-back Value Chain methodology
- The Automate/Augment lens
- PGA prompting practice — live
- Trend & domain card decks (physical or digital)
- An "Artifact from the Future" capstone you build & keep

From AI awareness to AI advantage — in a single day

Acceleration Lab is Harness Intelligence's flagship deep-dive: a full-day, hands-on lab where managers and professionals stop watching AI and start working differently with it — built around a customer-back value chain, the automate/augment mindset, and your AI platform of choice.

Most AI training shows you tools. *Acceleration Lab* shows your team where AI changes the equation in your business — and gives them the practice, the prompts, and the prototype to act on it.

42

Hi
Harness
Intelligence

What you'll gain:

- **Clarity** — map your customer-back value chain and see where AI moves the needle.
- **Capability** — PGA prompting, agent building, and AI thought-partnership, practiced live.
- **Confidence** — an automate/augment lens for deciding where AI fits and where it doesn't.
- **An Artifact from the Future** — a tangible deliverable that anchors the next 90 days.
- **A new mindset** — from "AI is coming for my job" to "our team just got superpowers."

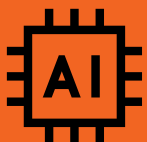

How it works (4 movements):

1. **Prepare** — Harness the *Intelligence Ecosystem*. Set AI agreements, understand what's really behind the chatbot, and ground the day in the seven forms of intelligence your work runs on.
2. **Explore** — Map today's value chain. Walk backward from customer outcomes through the work that produces them; surface the friction points worth attacking.
3. **Practice** — Capabilities into superpowers. Hands-on PGA prompting and agent building on your AI platform, using prompts grounded in your real value-chain work.
4. **Transport & Act** — *Artifact from the Future*. Use trend cards and the automate/ augment lens to reimagine the business in 2028; build a tangible artifact and a 3-Horizons action plan.

Acceleration Lab is delivered live, in-person (6.5 hours) or virtual (4 × 90-min cohorts), for 10-36 participants. Built for managers and professionals who'll be hands-on with AI day-to-day. Bring your real work; leave with a roadmap, an artifact, and a team that knows what to do Monday.

"I came in skeptical of one more AI workshop. I left with a working value chain, three Copilot agents, and a roadmap I could share with my team Monday morning."

From **Harness Intelligence**, delivered with Advantage Performance Group. For more information, **talk to your Advantage partner: contact@advantageperformance.com**

"The future of work isn't something AI does to your team. It's something your team does with AI — once they've had the chance to learn, apply, and build the confidence to act."
